

SUMMARY

Full-Stack & AI Software Engineer holding a Master's in Artificial Intelligence, specializing in building production SaaS, e-commerce, and automated data pipelines. Leverages **agentic development workflows (Claude Code, local IDE orchestration)** to accelerate feature delivery, maintain high code quality, and architect scalable backend systems

PROFESSIONAL EXPERIENCE

Full-stack Web developer at Datanim,

Nov 2025 – Present

- Developed and maintained features for Aniapps, a Ruby on Rails platform for accounting and statistical reporting, including data export workflows and dynamic filtering systems, and improved communication and internal tooling features across the Aniapps ecosystem
- Contributed to FormaPilot, a vocational training management system handling session scheduling, trainer assignment, attendance tracking, and financial reporting (revenue, costs, profitability)
- Built Exp'Eyes, a France-based payroll and financial consulting platform, delivering a secure client portal for document exchange and client-admin communication, with a fully tested Rails codebase and hardened authentication

Full-stack Web developer at Scandiweb

Apr 2025 – Sep 2025

- Delivered 20+ tickets on a Magento-based e-commerce platform, including new features, bug fixes, and system improvements
- Participated in an internal DevOps bootcamp covering AWS, Docker, Terraform, and Kubernetes, and contributed to building technical challenges used in developer hiring assessments

Software engineer freelancer at LD Talent

Feb 2024 – Oct 2024

- Architected automated web scraping and data cleansing pipelines using Python, Django, and Selenium, processing and structuring **2,000+ complex talent profiles** while reducing manual data entry workload by over 80%

Software engineer at Torre.ai

May 2023 – Dec 2023

- Fixed 80+ production bugs, improving platform stability and user experience
 - Developed 10+ new features across multiple squads
 - Worked with Scala (Play Framework), Python (Django), Vue/Nuxt, and JavaScript in distributed teams
-

EDUCATION

ABOU BEKR BELKAID UNIVERSITY

Master's, Artificial Intelligence

Sep 2022 – Sep 2025

- Thesis: Improving generalization of deep learning models for automated diabetic retinopathy detection

Bachelor's, Information Systems

Sep 2019 – Jul 2022

- Built a static website for an indie game project

Doctor of Pharmacy (Pharm.D.)

Sep 2015 – Nov 2021

- Thesis: Physicians' acceptance and knowledge in herbal medicine: A cross-sectional study in Northwest Algeria

UDACITY

Nanodegree, Data Analyst,

Nov 2022 – Mar 2023

- Data wrangling, visualization, and reporting for real-world datasets

Full Stack Web Development Student at Microverse

Apr 2022 – Nov 2022

- Completed 1300+ hours of intensive full-stack training in algorithms, data structures, and web development
 - Built 5 full-stack applications using Ruby on Rails, React, and Redux
 - Practiced remote pair programming, code reviews, and Agile workflows in international teams
-

SKILLS

Languages: Ruby, Python, Scala, JavaScript, TypeScript, PHP

AI & Agentic Workflows: Claude Code, Antigravity IDE, Agentic Orchestration, LLM-Assisted Refactoring, Deep Learning (PyTorch/TensorFlow)

Backend & Systems: Ruby on Rails, Django, FastAPI, Play Framework, PostgreSQL, MySQL, API Design

Frontend: React, Next.js, Vue.js/Nuxt, HTML5, CSS3

DevOps & Infrastructure: Docker, AWS, Terraform, Kubernetes, Git, Sentry, CI/CD Pipelines

Other: API design, RESTful services, web scraping, SEO optimization, remote collaboration, Agile workflows
